Shaquonna Williams

Columbia, MD | (443)599-2756 | shaquonna.lynna@gmail.com | LinkedIn | GitHub | Portfolio

SKILLS

- **LANGUAGES**: JavaScript, Typescript, Python, HTML, CSS, SQL
- **FRAMEWORKS & LIBRARIES**: Flask, Express.js, Redux, React, REST, Sequelize, Kanban, GitHub, Node.js, OOP, NestJs, Prisma
- **OTHER**: SQLite, PostgresQL, SQLAlchemy, Alembic, Bash, VSCode, Mocha, Figma, Postman, Chrome DevTools, Render, MongoDB

PROJECTS

Eater-Verse

- This application, a collaborative team project, draws inspiration from Yelp and Opentable.
- Worked as part of a team of four software engineers to create, track, and manage application features. Used GitHub for version control and Kanban for project management to minimize conflicts.
- Developed a RESTful API to manage and update a database through a frontend framework.
- Leveraged CSS grid, flexbox, translate and transform methods to implement Figma wireframes and media queries to ensure responsiveness

Flexitude

- This project was designed to investigate and address the practicality of individual experiences of users looking to get fit or maintain fitness.
- Normalized the SQLite database by utilizing a many-to-many association to store table data.
- Fetched data directly from the database for frontend components using a fetch request, bypassing the need for middleware like thunks, to create statelessness.

EXPERIENCE

Sadaora Inc. — **May 2025 - Present**
Full-Stack Software Engineer — *Remote*

- Developed and modernized software systems, aligning infrastructure upgrades with scalability and performance goals, resulting in improved system efficiency in a remote, collaborative setting
- Completed training in software engineering practices, focusing on system architecture, code quality, and infrastructure resilience, which enhanced my ability to contribute to technical transformations
- Resolved infrastructure challenges, ensuring reliable system transitions and enhancing problem-solving skills, which contributed to meeting evolving technical requirements
- Applied core principles of Object-Oriented Programming (OOP) and agile methodologies to deliver clean, maintainable code as part of a cross-functional engineering team.

Crazy Kreative Foods LLC — **Apr 2021 - Mar 2024**
Operator / Manager — *Baltimore, Maryland*

- Spearheaded strategic planning and organizational development for successful management and operation.
- Initiated the development and execution of business strategies designed to fulfill company goals and objectives, with a focus on forecasting scalability and expansion.
- Managed budgetary, expense tracking, and financial reporting duties, leading to a 25% reduction in overhead costs.

Amazon, Crazy Kreative Food, Point Pickup, Go Brands, InstaCart, Uber Eats, Postmates — **Apr 2015 - Present**
Independent Contract Driver — *Maryland*

- Utilized technology for route planning, delivery scheduling, and communication, ensuring on-time deliveries by effectively navigating and adapting to logistical challenges
- Developed and implemented strategies to improve contract performance and reduce delivery and customer disputes.
- Deployed safety measures for the secure handling, transport, and receipt of high-end merchandise

EDUCATION LANGUAGES

App Academy — **2024 - 2025**
Software Engineer Certification — *San Francisco*

Stratford University — **2013 - 2016**
Associate of Applied Science, Advance Culinary Arts — *Baltimore, Maryland*

LANGUAGES

- English (Fluent)
- Japanese (Working Knowledge)
