Shaquonna Williams
SOFTWARE ENGINEER

(443)599-2756   shaquonna.lynna@gmail.com   Portfolio   LinkedIn   GitHub   Baltimore, MD

SKILLS
LANGUAGES: JavaScript, Typescript, Python, HTML, CSS, SQL
FRAMEWORKS & LIBRARIES: Flask, Express.js, Redux, React, REST, Sequelize, Kanban, GitHub, Node.js, OOP, NestJs, Prisma
OTHER: SQLite, PostgresQL, SQLAlchemy, Alembic, Bash, VSCode, Mocha, Figma, Postman, Chrome DevTools, Render, MongoDB

PROJECTS
Eater-Verse   React, Flask,CSS, Alembic,HTML   live | github
This application, a collaborative team project, draws inspiration from Yelp and Opentable.
- Worked as part of a team of four software engineers to create, track, and manage application features. Used GitHub for version control and Kanban for project management to minimize conflicts.
- Developed a RESTful API to manage and update a database through a frontend framework.
- Leveraged CSS grid, flexbox, translate and transform methods to implement Figma wireframes and media queries to ensure responsiveness

Flexitude   React, Flask,CSS, SQAlchemy, HTML   live | github
This project was designed to investigate and address the practicality of individual experiences of users looking to get fit or maintain fitness.
- Normalized the SQLite database by utilizing a many-to-many association to store table data.
- Fetched data directly from the database for frontend components using a fetch request, bypassing the need for middleware like thunks, to create statelessness.

EXPERIENCE
Full-Stack Software Engineer   May 2025–
Sadaora Inc.
- Contributed to the development and modernization of software systems at a forward-thinking tech startup, aligning infrastructure upgrades with long-term scalability and performance goals in a fully remote, collaborative setting.
- Completed rigorous training in software engineering practices, with a focus on system architecture, code quality, and infrastructure resilience during periods of technical transformation.
- Strengthened problem-solving skills by resolving infrastructure challenges and ensuring reliable system transitions in a dynamic startup environment with evolving technical requirements
- Applied core principles of Object-Oriented Programming (OOP) and agile methodologies to deliver clean, maintainable code as part of a cross-functional engineering team.

Operator / Manager, Crazy Kreative Foods LLC
artisan bakery and catering company   Apr 2021 – Mar 2024
- Spearheaded strategic planning and organizational development for successful management and operation.
- Initiated the development and execution of business strategies designed to fulfill company goals and objectives, with a focus on forecasting scalability and expansion.
- Managed budgetary, expense tracking, and financial reporting duties, leading to a 25% reduction in overhead costs.

Independent Contract Driver
Amazon, Crazy Kreative Food, Point Pickup, Go Brands, InstaCart, Uber Eats, Postmates   Apr 2015 —
- Technologically proficient in route planning, delivery scheduling and communication, with the ability to navigate and adapt to logistical challenges to ensure on-time deliveries.
- Developed and implemented strategies to improve contract performance and reduce delivery and customer disputes.
- Deployed safety measures for the secure handling, transport, and receipt of high-end merchandise

EDUCATION LANGUAGES
App Academy - Fullstack software engineer bootcamp - Software Engineer Certification, 2024-2025
Stratford University - Associate of Applied Science in Advance Culinary Arts, 2013-2016

LANGUAGES
- English- Fluent
- Japanese-Working Knowledge
